PROFILE

Senior Frontend Engineer with 8+ years building scalable, high-performance web applications for enterprise eCommerce and SaaS. Expert in React, Next.js and TypeScript with a strong focus on performance, accessibility, and developer experience. Proven ability to lead architecture, elevate engineering culture, and deliver measurable improvements to Core Web Vitals.

CORE SKILLS

Languages / Frameworks: JavaScript (ES6+), TypeScript, React, Next.js, Remix

Architecture: Component-driven design systems, micro-frontends, modular scalable architecture

Performance / QA: Core Web Vitals, Lighthouse, React Profiler, lazy-loading, bundle analysis

Backend / Infra: Node.js, NestJS, Express, GraphQL, REST, Docker, AWS, CI/CD (GitHub Actions)

Testing / Accessibility: Jest, RTL, Cypress, axe-core, WCAG 2.1 awareness

Tooling: Vercel, Builder.io, Salesforce Commerce Cloud, Storybook, Figma tokens

PROFESSIONAL EXPERIENCE

Publicis Sapient

Remote, India

Joined through *Corra*, acquired by *Publicis Sapient* in Jun 2023

Lead Experience Engineer

Aug 2022 – Present

- Architected a modular React + TypeScript foundation used across multiple enterprise stores; established CI pipelines and component scaffolding to accelerate delivery.
- Built 50+ accessible, themeable UI components and integrated Figma tokens, improving delivery predictability and visual consistency.
- Reduced perceived load (measured LCP/FCP/TTI) by 25–40% across client sites through targeted bundle-splitting, image strategy, SSR/ISR tuning and caching.
- Implemented performance gates in CI (automated Lighthouse checks) and introduced a bundle visualizer to prevent regressions in production.
- Mentored engineers and led code-review standards; championed TypeScript-first workflows and automated tests.

Frontend Engineer

Jan 2022 – July 2022

- Engineered key features across React-based storefronts, collaborating with design and backend teams to ship scalable, high-quality user experiences.
- Introduced reusable UI patterns and component abstractions that accelerated delivery velocity and improved consistency across multiple projects.

Bititude Technologies

Kozhikode, India

Full Stack Developer

Aug 2017 – Dec 2021

- Delivered multiple client-facing applications using React, Angular and Node.js; led a 5+ developer team for feature delivery and maintenance.
- Designed modular Redux/TS architectures and migrated legacy codebases to modern React stacks with code-splitting and lazy loading.
- Built REST APIs, integrated databases (Postgres, MongoDB) and improved query performance for high-throughput endpoints.

SELECTED PROJECTS & CONTRIBUTIONS

- **Enterprise Design System:** Architected a TypeScript-first design system (Storybook + Figma tokens) supporting multi-brand theming and accessibility standards.
- **GNC eCommerce Migration:** Led frontend migration to Next.js; improved page load times by 50% using ISR and optimized data-fetching strategies.
- **Giblib Medical Platform:** Built real-time dashboards (React, GraphQL, WebSockets) for live session updates and analytics.
- **Open Source:** `svgIn-react` (secure SVG inlining) and `react-load-time-analyzer` (component load-time tooling) - include links in Applications/Featured.

ACHIEVEMENTS

- Delivered measurable Core Web Vitals improvements and integrated automated performance checks into CI for enterprise clients.
- Standardised TypeScript-first patterns and testing practices across multiple teams, reducing onboarding time and regressions.
- Introduced automated accessibility checks and improved keyboard/contrast compliance across critical user flows.

EDUCATION

B.Tech, Computer Science and Engineering

Cochin University of Science and Technology

CERTIFICATIONS

- Adobe Experience Manager Edge Delivery Services - Developer Professional
- DGGI – Diploma in Game Design and Integration

LANGUAGES & MOBILITY
